Phone Adapter

with 2 Ports for Voice-over-IP

Quick Installation

1 Connect the Phone Adapter

If you already have an account set up with Vonage, then proceed to Step 1.

If you do not have an account set up with Vonage, then go to www.vonage.com and sign up for service. After you have set up an account, proceed to Step 1.

Step 1 explains how to connect the Phone Adapter to your network and telephones or fax machines. Shown below is a connection diagram displaying a typical setup with one Vonage Internet phone line.

A Using a telephone cable, connect your telephone to the PHONE 1 port of the Phone Adapter.

B If you have a second Vonage line on your account, then connect another telephone or a fax machine to the PHONE 2 port of the Phone Adapter.

C Connect the included Ethernet network cable to the ETHERNET port of the Phone Adapter.

Connect the other end to one of your router's Ethernet ports.

D Connect the included power adapter to the POWER port of the Phone Adapter.

Connect the other end to an electrical outlet.

E The Power, Ethernet, and Phone LEDs will be solidly lit when the Phone Adapter is ready for use.

The installation of the Phone Adapter is complete. You may pick up the phone and make calls.

NOTE: Vonage supports 7-, 10-, and 11-digit dialing. Use 7-, 10-, or 11-digit dialing for calls within the same area code as your Vonage phone number. Use 10- or 11-digit dialing for calls outside of your area code.

NOTE: For information about your Vonage Internet phone service, refer to the Vonage service materials or visit www.vonage.com.
